

Environmental Management System

The EMS Scheme closely follows the ISO 14001 accreditation using a Plan, Do, Check, Act model. The subjects included are:

- Aspects and Impacts
- Objectives and Targets
- Environmental Policy
- Legislation
- Training and Awareness
- Communication
- Procedural
- Auditing
- Monitoring
- Non-Conformance
- Checking and Reviewing
- Continual Improvement

The most important element is continual improvement so the system develops to deliver the most efficient operation of your business.

The depth of detail in this scheme gives businesses the opportunity to go for ISO 14001, having done the majority of the work on this scheme.

The Benefits of the Environmental Management System

- Step away from ISO 14001
- Green Reputation
- Proof to customers, partners and the general public/local community that you have addressed your environmental impacts
- Increased ability to win new business and grant funding
- Consultancy help with aspects of the award
- Reduced costs
- Credit for measures already in place
- Networking with likeminded businesses, in similar and different sectors
- Increased confidence in your businesses ability
- Updates on new technologies
- Gives you a marketing advantage over competitors
- Increases staff moral and enthusiasm
